Department of Communicative Disorders
University of Wisconsin – Madison
1975 Willow Drive
Madison, WI 53706–1103

Graduate Study In Communicative Disorders

THE UNIVERSITY
of
WISCONSIN
MADISON

*The mission of the Department of
Communicative Disorders at the University
of Wisconsin–Madison is to provide
students with a solid foundation in both the
theoretical and applied aspects of the
discipline of Communicative Disorders.*

Courtesy of Jeff Miller/University of Wisconsin–Madison

**DEPARTMENT OF
COMMUNICATIVE DISORDERS**
University of Wisconsin-Madison

Our graduate programs in Speech–Language Pathology and Audiology are consistently ranked in the top five nationally. Our graduate program in Speech–Language Pathology is currently ranked #2 in the country by *U.S. News and World Report*.

The department is one of the oldest and most well-known doctoral programs in the field. Since 1968, over 350 Ph.D. degrees have been confirmed. From 1997 to 2008, there have been 416 M.S., 45 Ph.D., and 17 Au.D. degrees confirmed.

Our faculty is nationally and internationally recognized for their basic and applied leading-edge research. Most faculty research labs are funded by the National Institutes of Health (NIH) and offer valuable opportunities for students to become involved in a variety of different projects. In addition, faculty have affiliations, joint-appointments, and collaborative relationships with other departments and centers on campus including:

- Division of Otolaryngology–Head and Neck Surgery
- Waisman Center
- Department of Psychology
- Department of Neurology
- Department of Educational Psychology
- Neuroscience Training Program
- Communication Aids and Systems Clinic
- Department of Rehabilitation Psychology and Special Education
- Institute on Aging

Department Faculty

Michelle Ciucci, Assistant Professor

Swallow and voice neuroscience, sensorimotor control, dysphagia, Parkinson disease
608–265–6516; ciucci@surgery.wisc.edu

Nadine Connor, Associate Professor

Vocal function, voice disorders, aging, neuromuscular function in the head and neck
608–265–8711; connor@surgery.wisc.edu

Jan Edwards, Professor

Phonological and lexical development in typically developing children and clinical populations
608–262–6768; jedwards2@wisc.edu

Susan Ellis Weismer, Professor

Language delay in late talkers, specific language impairment, language abilities in autism
608–262–6487; ellisweismer@wisc.edu

Marios Fourakis, Professor

Speech production and perception
608–262–7491; fourakis@wisc.edu

Cynthia Fowler, Professor

Auditory evoked potentials and aging
608–262–6483; cgfowler@wisc.edu

Katie Hustad, Associate Professor

Speech intelligibility; augmentative and alternative communication; motor speech disorders
608–265–9977; kchustad@wisc.edu

Margarita Kaushanskaya, Assistant Professor

First and second language acquisition; bilingualism; literacy and phonological development
608–262–6473; kaushanskaya@wisc.edu

Ruth Litovsky, Associate Professor

Binaural hearing and cochlear implants
608–262–5045; litovsky@waisman.wisc.edu

Robert Lutfi, Professor

Physical and psychological acoustics
608–262–6485; ralutfi@wisc.edu

Kim Schairer, Assistant Professor

Otoacoustic emissions, reflectance, and psychoacoustics
608–262–6486; kschairer@wisc.edu

Lyn Turkstra, Associate Professor

Neurogenic communication disorders; brain injury in adolescents
608–262–7583; lsturkstra@wisc.edu

Julie Washington, Professor

Department Chair
Language and literacy development in diverse populations
608–262–7823; jawashington@wisc.edu

Gary Weismer, Professor

Normal speech production; communication impairment in neurological disease
608–262–6472; gweismer@wisc.edu

John Westbury, Professor

Speech acoustic–kinematic relationships; motor control; biomechanics of speech
608–265–4811; westbury@wisc.edu
